

SIEMPRE (ALWAYS)

Book One

Siempre is not your run-of-the-mill neck-biter. It integrates adventure, history, romance and sensuously charged passages; with multicultural characters, charismatic heroines and despicable antagonists in a believable world where vampires secretly, for the most part, co-exist with humans. The foundation of the story is a centuries-long friendship between Alina (Latina) and Layla (Persian) taking on life through the eyes of eternity after both are turned by Luther. The ancient vampiric's unrequited love drives him to pursue Alina into present-day. For the first time in three-hundred-years, Alina insists on going it alone for the safety of Layla, and also for their mutual friends. She finds sanctuary in a cabin in the Canadian forests to continue her research.

After centuries of testing, she finally creates a serum which allows her to bask in sunlight for short periods, giving Luther more reason to chase her. When she flees to California, The Dark Ancient One finds her home in the forests of Big Bear Lake but Sam, a human, rescues her. When Luther witnesses the consummation of their forbidden love his fury rages, but vampires need permission to enter a mortal's home. He is powerless to drain Sam and recapture Alina. Yet, greater danger lurks. The future of humankind is in peril after Luther's recklessness allows The Immortals, the Vampire Nation's governing body, to discover the existence of the serum.

Here is where this piece of the tale ends and the story's ongoing saga continues in Book Two.

"I want more, more, more. Alina and Sam may share a story that has been told a hundred times in the genre, but they are so well written that it's easy to root for them." "A pleasant surprise...a paranormal romance with a very strong female protagonist who isn't crude, masculine, or a female desperately wanting to be dominated." "Alina...deep character with a brain and she likes to use it...a great book with a fantastic flow and anyone who wants a unique vampire story to read, this is your book."
